Patent Award

May, 2016 – Patent # 9,271,953 issued by the U.S. Patent and Trademark Office

Abstract: The present invention includes compositions and methods for treating certain conditions, at least one of autonomic dysfunctions or vascular diseases.

Properties: When ingredients are combined precisely as described, effective vagus nerve stimulation occurs, restoring parasympathetic nervous system function despite any genetic abnormalities in the pathway for making acetylcholine.

March 2019: Patent # 10,238,673 B2 issued by the U.S. Patent and Trademark Office

Abstract: The present inventions include compositions and methods for treating certain conditions such as dry eye and dry mouth.

Properties: When ingredients are combined precisely as described, basal tear and saliva production are restored via stimulation of the lacrimal nerve to produce tears, and stimulation of the vagus nerve to help control inflammation that causes dry eyes.

October 2020: Patent # CA 2,940,871 issued by the Canadian Intellectual Property Office

Abstract: Methods and Compositions for Correction of Organ Dysfunction

Properties: The present invention relates in general to the field of prevention and treatment of conditions associated with autonomic dysfunction and their commonly found co-morbid conditions including vascular disorders, immunological disorders and organ dysfunction and more particularly, to methods and composition for the prevention and treatment of the same.

Certifications

Licensed Optometrist	Texas Optometry Board
Certified Therapeutic Optometrist	Texas Optometry Board
Optometric Glaucoma Specialist	Texas Optometry Board

Honors
